

PERMIT CHECKLIST

Many home improvement projects require a permit. Permits allow the city or county to inspect your property to ensure the building will be safe.

YOUR PART:

- ✔ **Select your shed and purchase** (or have it quoted) BEFORE applying for the permit.
- ✔ **Put yourself down as the contractor.** Liberty Sheds is a manufacturer, not a contractor so we cannot pull permits.
- ✔ **Specify that your shed is a PORTABLE building** (on the permit application)
- ✔ **As the homeowner,** you assume responsibility for the project when the permit is issued.
- ✔ **Important items to think about:** Size restrictions, anchor requirements, setback requirements.

OUR PART:

- ✔ **Liberty backs all of our sheds** with an all-inclusive 8-year warranty — the best in the industry. There is no need to worry about your shed failing.
- ✔ **At your request,** we will provide documents about the shed that may be needed for the permit process.
- ✔ **Liberty has a \$1M liability policy** for your protection during the delivery process.
